

IMPROVE PERFORMANCE OF LAYERS

Improve overall feed digestibility

Rovabio

- Rovabio® is a multi-enzymatic solution which addresses the whole indigestible vegetable fraction of feed, working on any diet
- It enables diet reformulation to increase the digestibility of nutrients and improve layer efficiency and egg quality

Potential savings: 10 €/t of feed <<< 

Help laying hens fight oxidative stress

Selisseo®

- Selisseo® is the only pure form of organic selenium, which consistently provides 100% Se as OH-SeMet
- Selisseo-fed layers have an optimal antioxidant system that improves egg production and egg quality:
 - +4.3 eggs/hen vs Sodium Selenite and +2.0 eggs/hen vs Seleno-Yeast
 - more marketable eggs produced per hen
 - better eggshell thickness and strength
 - better egg haugh units

Sustain egg production and quality in aged layers

Egg quantity and quality deteriorate as hens get older

Selisseo®

- Selisseo® is the only pure form of organic Se, which consistently provides 100% Se as OH-SeMet
- Selisseo® sustains antioxidant status of hens, helping them to maintain their performance
- From 63 to 90 weeks of age, Selisseo® improves laying rate by 9% vs sodium selenite

Improve digestive performance

Adimix®

FRA® Butyryn Hybrid / FRA® Butyryn Ultra

- Optimize gut health for fewer cracked eggs, less dirty eggs
- Adisseo can support you with a comprehensive range of butyrate-based products

Protect animals from mycotoxins

Toxy-Nil® Plus

- Protect animals from adverse effect of mycotoxins: loss of performance and oxidative stress
- Adsorbs, bio-inactivates and detoxifies mycotoxins

Adimix®

- Optimise digestive performance by using Adimix Precision, a precision delivery coated sodium butyrate
- Less cracked eggs thanks to better shell quality
- Less dirty eggs
